Use of a Post Card as a Receipt for Correspondence in Patent-Related Matters

SUMMARY:

Anyone who uses a postage meter to apply postage to their return receipt postcards must ensure that the meter postmark on such postcards does not show the date to ensure their receipt of the postcards.

DISCUSSION:

The United States Patent and Trademark Office (Office) recently published a notice in the *Official Gazette* relating to postcard receipts for Trademark papers. See "Use of a Post Card as Receipt for Trademark Papers Filed", 1246 OG 42 (May 8, 2001). Similar to the Trademark Operation of the Office, the Patent Operation also has a long-standing practice of providing confirmation of the receipt of papers in the Office by way of return receipt postcards. A receipt of any item(s) filed in the Office may be obtained by enclosing with the item(s) a self-addressed postcard (with the proper postage) specifically identifying the item(s). The person receiving the item(s) in the Office will promptly compare the listing on the postcard against the item(s) being filed to verify that all the items listed on the postcard are properly identified and included among the items being submitted to the Office. If any of the items listed on the postcard are not included among the items being submitted, those items will be lined through and the postcard initialed by the person receiving the items. The Office will stamp the receipt date on the postcard and place it in the outgoing mail for mailing to the address provided on the postcard. See Manual of Patent Examining Procedure (MPEP) (8th ed., August 2001), Section 503.

The customer is solely responsible for placing the proper postage on the self-addressed postcard. Proper postage means that it has a stamp (or stamps) of at least the correct stamp amount or a meter stamp/postmark that complies with United States Postal Service (USPS) requirements. The USPS provides in its Domestic Mail Manual (DMM) that the date in a meter postmark must be the actual date of deposit with limited exceptions (i.e., mail deposited after the day's last scheduled collection may bear the actual date of deposit or the date of the next scheduled collection, and authorized dispatch prepared presort mail accepted after midnight may bear the previous day's date). The USPS also provides in the DMM that meter postmarks used to prepay reply postage must **not** show the date. Thus, any return receipt postcard containing a dated meter postmark may not be delivered by the USPS to the address provided on the postcard. This is because the postcard will be mailed by the Office substantially after the date on which the meter postmark is printed thereon by the customer. Accordingly, to ensure the receipt of return receipt postcards, customers must either: (1) purchase already stamped postcards from the USPS or affix postage stamps to their postcards, or (2) if a postage meter is used, ensure that the meter postmark does **not** show the date (as is set forth in the instructions in their postage meter license agreement regarding prepay reply postage). Once the Office has made an initial attempt to mail a postcard receipt, the Office cannot assume responsibility for further handling any postcard bearing improper postage that is deemed undeliverable by the USPS.

Any questions concerning this notice should be directed to Eugenia Jones or Fred Silverberg, Senior Legal Advisors in the Office of Patent Legal Administration. Ms. Jones can be reached by telephone at (703) 306-5586 and by e-mail at eugenia.jones@uspto.gov. Mr. Silverberg can be reached by telephone at (703) 305-8986 and by e-mail at fred.silverberg@uspto.gov. Questions regarding the use of postage meters and meter stamps should be directed to the United States Postal Service.

Notice Concerning Safety of USPTO Mailings

In response to inquiries that the Office has received from its customers, the United States Patent and Trademark Office (USPTO) has obtained reassurance from the Centers for Disease Control (CDC) about the safety of mailings from the USPTO. Some parties have expressed concern because some mail from the USPTO was in the past routed through the U.S. Postal Service's Brentwood Sorting Station in Washington, D.C., where workers are diagnosed as having contracted anthrax. Most outgoing correspondence from the USPTO did, through Friday, October 19, 2001, pass through the Brentwood Sorting Station, but no outgoing trademark correspondence used that facility. The Office on October 22, 2001, contacted the CDC. The CDC advises us that it is highly unlikely that mail passing through the Brentwood postal facility was contaminated and poses any threat.

The Brentwood Station is now closed, and USPTO mailings, both incoming and outgoing, are currently being routed through another station.

In conveying this information, the USPTO does not of course intend to discourage its correspondents from undertaking any enhanced precautions in their mail operations that recent events may have led them to consider. The USPTO had itself, before the Brentwood incident, undertaken added training and safety measures in its mail operations. It appears, however, that the fact that our customers receive mailings from the USPTO should not provide a more particularized basis for health and safety concerns.

SPECIAL BOXES FOR PATENT MAIL

Special box designations should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these special boxes. If any documents other than the specified type identified for each special box are addressed to that box, they will be significantly delayed in reaching the appropriate area for which they are intended.

Some correspondence may only be submitted via the Office's electronic filing system (EFS). For example, the following publication requests must be submitted via EFS:

a request for publication of an application as amended during examination (37 CFR 1.215(c));
a request for redacted publication (37 CFR 1.217(b));
a request for voluntary publication of an application filed before November 29, 2000 (37 CFR 1.221(a)); or
a request for republication of an application that has already been published (37 CFR 1.221(a)).

Instructions on how to file such a publication request via EFS are located on the Office's Electronic Business Center on the Office's Internet Web site http://www.uspto.gov <http://www.uspto.gov>) under the Electronic Business Center section.

Reference Collections of U.S. Patents and Trademarks
Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information for the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis optical disk series are available at all PTDLs to increase access to that information. It is through the optical disk systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI^3) at the Sunnyvale Public Library in Sunnyvale, California and at the South Central Intellectual Property Partnership at Rice (SCIPPR) at the Fondren Library of Rice University in Houston, Texas.

SECTION 2.— INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
